SW Engineering CSC 648
Spring 2023
Team 06
Milestone 03

jshin7@mail.sfsu.edu

Justin Shin (Team Lead)
Jack Lee (Back End Lead)
Ryan Scott (Github Lead)
Konnor Nishimura (Front End Support)
Xiao Deng (Back End Support)
Alexander Scott Griffin (Front End Lead)

Meeting Date: 4/26/2023

Summary of UI Feedback:
- No space between search bar and categories
- Home page shows restaurants not dishes
  - Show category and delivery time
- Detailed display boxes. (distance, cuisine)
- Move restaurants portal, drivers portal, and about us portal below the logo
- Text excerpt for details under the header.
- Restaurant registration should add menu info general info segments.
- Make use of extra tabs to make them come back Home when done

Summary of Code Feedback:
- Make sure headers are on all code files
- Ensure variable names match database entry names where applicable

Summary of Github Usage Feedback:
- Include more detailed commits
  - Small commits may help
- Fix latest commit messages in main branch to give a better impression of progress and features

Summary of Database Feedback:
- Category should be own table, use as foreign key in restaurant data

Summary of Teamwork and Risk Management Feedback:

Next Steps:
- Incorporate registration to database
- User authentication with session handling
- Add orders to shopping cart
- Bundle shopping cart orders and send them to driver pickup queue
- Tie status updates to customers with sockets

3 weeks
Delegations:

Database injections
- Registration:
    - User
    - Restaurant application
    - Drivers
